

City & Guilds 2391-51 Level 3 in Periodic Inspection & Testing of Electrical Installations

All of our training is provided to the highest standards. We take customer feedback extremely seriously, and through training hundreds of candidates, we've developed training courses that are professional, ran by experienced tutors and help our customers to gain officially recognised qualifications in several different disciplines.

Our trainers deliver our training courses in an approachable, easy-to-understand and enjoyable manner, ensuring you get the best possible training experience. Every trainer we use is fully qualified, individually accredited and will work closely with you throughout the course to ensure you get the knowledge you need.

Course Overview

Updated to the BS7671 Amendment 2.

With this course, you can gain the necessary knowledge to safely perform periodic inspections and testing of electrical installations.

A fully accredited City and Guilds electrical training course, 2391-51 covers both the theory and practical work required to test and verify electrical installations and is an excellent course for any practising electrician who would like to work more closely with electrical installations.

Course Details

Who is this course suitable for?

This course is recommended for practising electricians who are yet to perform initial inspection on electrical installations, or those with previous experience in this field looking for an update on their previous training. It is recommended that you take the City and Guilds 2391-50 Verification course before attending this training (both courses are also available as a combined package).

Course Aim

City and Guilds 2391-51 is both a theory-based and a practical course; you can both expect to be in the classroom carrying out important theory based on initial verification and you can also expect to gain practical experience on our in-house electrical training bays.

What Does the Course Cover?

- ▶ Requirements for periodic inspection and testing
- ▶ Safety management procedures when undertaking periodic inspection and testing
- ▶ Requirements for the periodic inspection of electrical installation
- ▶ Requirements for testing electrical installations during periodic inspection and testing
- ▶ Performing periodic inspection and testing of electrical installations

Entry Requirements

There are no prior qualifications required to attend this course. We do recommend that those interested in this course have basic knowledge and understanding of electrical science and/or principles/experience of electrical installation work. Anyone attending training should also have a good level of both spoken and written English.

Assessments

This course includes a multiple choice examination (40 questions - 80 minutes), a short answer test (1 hour) and a practical test (2 hours).

Course Certification

On successful completion of the course assessment, you will receive a City & Guilds 2391-51 qualification.

Course Materials

We recommend purchasing a copy of the IET Wiring Regulations and IET Guidance Note 3 for use on the course. Both books can be used during the course and during the open book examinations and can be purchased at www.testers.co.uk

Related Courses
