

CAT and Genny Operator Course From Radiodetection

All of our training is provided to the highest standards. We take customer feedback extremely seriously, and through training hundreds of candidates, we've developed training courses that are professional, ran by experienced tutors and help our customers to gain officially recognised qualifications in several different disciplines.

Our trainers deliver our training courses in an approachable, easy-to-understand and enjoyable manner, ensuring you get the best possible training experience. Every trainer we use is fully qualified, individually accredited and will work closely with you throughout the course to ensure you get the knowledge you need.

Course Overview

The CAT and GENNY Course (also referred to as Cable Avoidance Training) is an essential course for anyone that has to carry out excavation work as part of their job role. Suitable for supervisors, managers, and users of CAT & Genny (cable avoidance tools) equipment.

It will enable the users to competently use cable avoidance tools (CAT & GENNYS) to identify areas that pose a risk of striking buried underground services such as cable and pipes.
